\*\*She is a great source for helping folks replace old, archaic belief systems, often steeped in outdated religious beliefs. In addition to the annual conference she facilitates, she has written several books geared toward healing grief and connecting with the afterlife.

## Psychic Mediums:

There are many talented mediums doing this sacred work all over the world today and I encourage you to seek one out when you feel ready to take that step. I would advise booking with a medium that comes with recommendations from someone you know and trust. If this is not possible, then Bob Olson's list of tried & tested psychic mediums is a good place to start:

Here are a handful of favorites that I have personally experienced. I have found each of these people to be ethical in their practice, working from a heart-centered space, humbly allowing Spirit to speak through them. I have received personal healing messages from many of my deceased loved ones through each of these gifted individuals.
